## Who We Are?

Lutana company, which was established in Istanbul in 2015 under the name of Ayas Cam in order to bring a new color to the art of glass and porcelain decoration, has managed to exist both in Turkey and abroad by addressing people's tastes by processing glass with the spirit of the artist during its 6 years of service.

Our company brings together the glass and porcelain products that it provides in plain form with innovative ideas and tasteful designs and presents them to you as original products by our craftsmen.

Everyone has the right to use handmade products, and we aim to reach as many people as we can. While we cooperate with many companies in the country, we also cooperate with various companies abroad in gulf countries such as Kuwait and Saudi Arabia.

Our company, which started out with wholesale sales, has now started to sell retail products and has succeeded in enabling these products to find a place in our homes in our country.

## Mission

Each individual wants to have unique products, to use products that appeal to his own taste, and even to offer treats to his guests. It is precisely in this direction that we carefully design glass and porcelain and present them to you. Our goal is to be the best in this business, at the same time to ensure customer satisfaction with quality and stability.

## Vision

Always open to innovative designs, we want to contribute to the national economy by carrying our country further than the 16 countries we represent abroad, and at the same time, we want to bring our brand to more people. In this direction, we aim to grow with an innovative approach and by expanding our employment area.

# İÇİNDEKİLER / CONTENTS
